ABOUT LITTLE GIANT LADDERS - COMPANY HISTORY

In the 1970's, Little Giant Ladder Systems chairman and founder, Harold "Hal" Wing, met a German painter who had an interesting idea and a primitive prototype of a new kind of ladder. Hal enhanced the ladder and engineered what is now known as the strongest, safest, most versatile ladder in the world—the Little Giant Ladder System. This professional-grade, multi-use ladder can be set up in 24 different positions and is probably the most famous ladder in the world. Hal performed demonstrations of the ladder nationwide at state fairs and trade shows, building and packaging orders out of his garage. Working side-by-side with his wife Brigitte and their seven children, Hal built the company on a foundation of quality and innovation. Gradually, both do-it-yourselfers and professionals all over the world have come to understand the Little Giant Ladder System is the best ladder in the world.

In 2003, Little Giant Ladder Systems' sales skyrocketed after the launch of an infomercial starring Hal Wing. Instead of painting a gimmicky picture, the infomercial clearly and concisely represented the ladder's benefits, forever establishing the Little Giant brand and its products as a household name.

From its humble beginning, Little Giant Ladder Systems is now one of the world's largest manufacturers of ladders, supplying products to discerning homeowners and professionals all over the world.

Ladders Australia

LITTLE GIANT LADDERS AUSTRALIA

Little Giant Ladders Australia is proudly owned and operated by an Australian family who have been in business for over 25 years.

Our team pride themselves on supplying product with only the highest standards, whilst offering a friendly, reliable and professional service to our customers.

Little Giant Ladders Australia is partnered with safety professionals all over the globe to develop real solutions to real safety problems.

At Little Giant Ladders, we aren't driven by the number of ladders we build, but by the individuals who use them – the hard-working men and women of Australia who are the backbone of industry and progress. They put their lives at risk to make things happen. In an era of progress and innovation, the traditional designs by most ladder companies are virtually unchanged. Unfortunately, ladder injuries have increased by 50% in the last decade, so the ladder industry needs to do better. We are leading the charge by supplying the safest ladders in Australia. We believe it's better to build a fence at the top of a cliff than park an ambulance at the bottom.

As Little Giant Ladders are Australia's preferred ladder dealers, we like to make it easier for customers to buy our ladders online. Make sure you check out our range for yourself, and feel free to contact us for more information. Little Giant Ladders Australia is an authorised retailer of Little Giant Ladder Systems USA.

3', 4', 5' & 6' ENCLOSED, FIBERGLASS PLATFORM LADDER

1. SIMPLE SETUP AND STORAGE

One movement, one person, one second—that's all you need to handle the Fortress like a pro. Just push the platform handle to deploy or pull it to fold.

2. ENCLOSED PLATFORM

The extra-large standing platform features a gated, wraparound enclosure that shuts automatically when you step in.

3. GROUND CUE

Show your ankles some love. 20% of ladder accidents come from missing the last step on the way down. With the Ground Cue®, putting weight on the bottom step makes an audible and tactile "click," letting you know you've reached the final step of the ladder.

4. INNOVATIVE TOOL TRAY

Slots, holes, hooks, and a closeable container. This versatile top cap is our best one yet—plus, you can lean on it.

FULL BOX RAIL
CONSTRUCTION

The XL Standing Platform reduces dangerous falls and is comfortable to stand on for extended periods while working.

A full-box construction makes the ladder look slim, but is stronger and lighter than most traditional A-frame ladders.

Made from lightweight, non-conductive fibreglass, you can safely use it around electricity.

1-Year Limited Warranty • 150kg Australian Industrial Rating AS1892.1:2018 • Patents Pending

3-STEP NON-CONDUCTIVE FIBERGLASS STEP STOOL

1. NON-SLIP STAIRCASE STEPS

Three steps to your truck bed, grab your equipment, three steps back down—all while facing forward. Ultra-wide, non-slip steps with almost no overlap make this step stool a genuine portable staircase.

2. TOOL TRAY AND HANDRAIL

Keep your tools close and your safety rail closer. The rotating safety handrail is both a sturdy lean point for added stability and a versatile tool tray for equipment that needs to be on hand.

3. SLIM PROFILE

Stop lugging a ladder to do a stool's work. The Jumbo Step is lightweight, easy to carry, and folds into a slim storage profile.

4. OVERSIZED FEET

Need to set up over grating? No problem. The Jumbo Step's slip-resistant, oversized feet keep it steady and secure on a variety of industrial surfaces.

5. NON-CONDUCTIVE FIBERGLASS

Made from durable fiberglass, this step stool is designed for sites with electrical safety requirements.

3' STEP STOOL BUILT FOR THE TRADES

⚡ NONCONDUCTIVE
FIBERGLASS SIDE RAIL ⚡

1. QUICK SETUP

No hassle, no messing with latches and no pinched fingers. The Sure Step's nylon spreader straps let gravity do the work: just grab one of the top steps and let the stool fall open or closed.

2. OVERSIZED FEET

Set up anywhere with confidence. Slip-resistant, oversized feet keep the Sure Step exactly where you put it, whether that's on solid ground or a grated surface.

3. FULL-BOX STEPS

The Sure Step features treaded full-box steps that are climbable on either side. Plus, the split top step means you have a wider, more stable standing platform when you're furthest from the ground.

4. NON-CONDUCTIVE FIBERGLASS

Made from durable, lightweight fiberglass, this step stool lets you work fearlessly around electricity.

5. COMFORTABLE TO STRADDLE*

The Sure Step supports a straddle position, making it easy to change working directions.

When you need a step stool that's as fast as you are, the Little Giant® Sure Step™ has your back.

This non-conductive, fibreglass step stool is as sturdy as it is lightweight, and the nylon spreader straps make folding the Sure Step™ a one-handed, simple process. Available in a 3 step model, the Sure Step™ exceeds the AS1892.1:2018 Australian Standards and has a 150kg Industrial Rating.

*A 1.7m tall person with a 30cm vertical reach

1 LADDER, ∞ JOBS.

1. MULTI-POSITION LADDER

Multi-position ladder easily converts to A-frame, extension, 90-degree, staircase and trestle-and-plank* scaffolding configurations.

2. ROCK LOCK[®]

Easy-to-use Rock Lock[®] adjusters move the inner section of the ladder to the height you need.

3. TIP & GLIDE[™] WHEELS

Tip & Glide[™] wheels allow for smooth ladder transportation.

4. TWO-PERSON STEPLADDER

Meets AS1892.1:2018 standards. In A-Frame position, it holds 150kg on both sides.

*Trestle brackets and Plank[™] sold separately.

PROJECT TRAY™ (15012)

The Project Tray offers one convenient location for all of your tools. It includes slots for power cords, screwdrivers, knives and other tools along with recessed trays for paint containers and a magnetic dish for loose nails, screws, nuts and bolts. It can even hold your drink while you work.

The tray fits to any Little Giant Multi-use ladder and holds up to 12kgs.

Compatible with:

Dark Horse, Skyscraper, Epic,

Velocity, Leveler, Conquest All-Terrain

Size: 30cm x 35cm

Storage size: 44cm x 30cm

CARGO HOLD™ (15040)

The Cargo Hold allows you to keep all your tools at arms reach and reduces trips up and down the ladder. It consists of pockets and pouches to help organise your tools in a neat and orderly fashion. Store it inside the ladder or move it to the outside rung for easy access.

Compatible with:

Dark Horse, Epic, Skyscraper, Velocity,

Leveler, Conquest All-Terrain

Size: 32cm x 11cm

Weight: 1kg

AIRDECK (26057)

The Airdeck can be used as a safety handrail and provides confidence and comfort when climbing up and down the ladder.

The other main feature is the tool tray. This is designed to accommodate screwdrivers, drills, hammers paint tins and more. It includes a magnetized section keeping loose screws and nails in place. The tray is rated to hold 11kgs.

Compatible with:

Epic & Conquest All-Terrain

Size: 60cm x 42cm

Weight: 2kg

WORK PLATFORM (10104)

The Work Platform fits on any rung and is rated up to 150kgs.

It's primary use is to act as a wide platform to stand on which reduces foot and leg fatigue when standing on rungs for an extended period of time. It simply slides out and kicks back in when not in use. A second platform can be use as a tool/paint tray.

Compatible with:

Dark Horse, Epic, Skyscraper, Velocity,

Leveler, Conquest All-Terrain

Size: 30cm x 30cm

Storage size: 44cm x 31cm

Weight: 2kg

TELESCOPING PLANK

The work planks convert any of our multi-use ladders into simple scaffolding. This high-strength plank is rated to hold 250kgs and enables two people to use both hands. Lengthen it for more coverage & shorten it for easier storage. Features a lockless extension system. Width of all models is 33cm

They are available in 3 lengths:

Small - 1.8m to 2.75m (10069) **Medium** - 2.45m to 3.95m (10813) **Large** - 3.05m to 4.90m (11016)

Compatible with:

Dark Horse, Epic, Velocity, Leveler, Skyscraper, Sure Step

Part Number	Model	Min/Max Length	Storage Width	Storage Depth	Weight
11069	6'-9'	1.8m - 2.7m	34cm	8cm	15kg
11813	8'-13'	2.5m - 3.9m	34cm	8cm	18kg
11915	9'-15'	3.0m - 4.9m	34cm	8cm	20kg

WING SPAN™ WALL STANDOFF (10111)

The Wing Span Wall Standoff is perfect for working around windows, gutters, or any other obstacle that attempt to prevent you from safely completing your task. The extra width also adds more stability and versatility when attached in the extension position. Max width is 1.3m with a standoff of 30cm.

Compatible with:

Dark Horse, Velocity, Leveler, Conquest All Terrain

Size: 1.3m x 30cm Weight: 2.5kg

TRESTLE BRACKETS (Leveler Kit (26999))

Our Trestle Brackets allow you to convert your Ladder into two fixed trestles. Add a Little Giant Telescopic Plank to create a scaffold type set up, reducing the amount of trips required to adjust the ladder.

Trestle Brackets are a different size for each of the ladders below:

Compatible with:

Velocity, Leveler, Epic

TOOL TRAY (15047)

Keeps all your tools within arms reach.

Compatible with all Multi-Function Ladders:

Epic, Leveler, Velocity, Dark Horse 2.0, Conquest All-Terrain

Size: 30cm x 15cm

Weight: 1kg Max Tray Weight: 11kg

LEG LEVELER (12106)

The Leg Leveler is used to stabilize our ladder systems on uneven surfaces ensuring your work environment is as safe as it possibly can be.

Compatible with:

Velocity, Leveler, & Epic Ladders.

****Not suitable for Dark Horse.**

CLIMB ON™

Preventing Injuries, Saving Lives

Every day nearly 2,000 people are injured while using a ladder. Nearly 100 of them suffer a long-term or even permanent disability. And every day, one person dies, never returning home to their family and friends. These numbers are staggering when you think of each individual's life, and especially the people who love them.

We are driven not by the number of ladders we build, but by the individuals who use them—the hard-working men and women of the world who are the backbone of industry and progress. They put their lives at risk to make things happen. They are dedicated working people with families, hopes and dreams.

If we can help one more of these people get home safely each day, we will have done our job—that's what gets us out of bed each morning. Ladders will always be a necessity in nearly all walks of life, so we need to find ways to prevent these accidents and save lives.

We believe there are two ways to prevent these accidents: First, providing effective, frequent, and relevant safety training; and second, designing safer climbing and access equipment.

Designing for Human Nature

Although it is extremely important, training alone is not enough. Even an experienced, well-trained professional can fall off an ordinary traditional ladder. Our new professional climbing equipment will help operators avoid the three most common causes of both OSHA safety citations and ladder-related injuries and fatalities.

1. Repeated handling of heavy climbing equipment
2. Using the wrong ladder for the job; using the right ladder the wrong way
3. Overreaching

In an era of worldwide progress and innovation, the traditional designs sold by most ladder companies have remained all but unchanged, even though the incidence of ladder injuries increase each year. The ladder industry can do better; and we are leading the charge. We engineer our professional access equipment to prevent as many falls as possible. It is better to build a fence at the top of a cliff than to park an ambulance at the bottom.

The Future of Climbing Equipment

We developed this new professional line of access equipment with numerous features and safeguards that combat the common misuses of ladders. Little Giant has taken the next step in climbing safety by creating products engineered to protect the users with designs that account for human behaviour.

Perhaps our long-held manufacturing creed sums up our commitment to provide the safest access equipment in the world—every weld, every rivet, every rung, and every person matters!
